

JAVA.UTIL.DATE.TOSTRING METHOD

http://www.tutorialspoint.com/java/util/date_tostring.htm

Copyright © tutorialspoint.com

Description

The **java.util.Date.toString** method Converts this Date to a String of the form: dow mon dd hh:mm:ss zzz yyyy

Declaration

Following is the declaration for **java.util.Date.toString** method

```
public String toString()
```

Parameters

- NA

Return Value

The method returns a string representation of this date.

Exception

- NA

Example

The following example shows the usage of java.util.Date.toString method.

```
package com.tutorialspoint;

import java.util.*;

public class DateDemo {

    public static void main(String[] args) {

        // create a date
        Date date = new Date(92, 1, 10);

        // print the string representation
        System.out.println("String : " + date.toString());
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
String: Thu Jan 10 02:00:00 EST 1992
```
