

JAVA.UTIL.LINKEDLIST.ADDFIRST METHOD

http://www.tutorialspoint.com/java/util/linkedlist_addfirst.htm

Copyright © tutorialspoint.com

Description

The **java.util.LinkedList.addFirst** method inserts the specified element at the beginning of this list.

Declaration

Following is the declaration for **java.util.LinkedList.addFirst** method

```
public void addFirst(E e)
```

Parameters

- **e** -- the element to add

Return Value

This method does not return any value.

Exception

- NA

Example

The following example shows the usage of java.util.LinkedList.addFirst method.

```
package com.tutorialspoint;

import java.util.*;

public class LinkedListDemo {

    public static void main(String[] args) {

        // create a LinkedList
        LinkedList list = new LinkedList();

        // add some elements
        list.add("Hello");
        list.add(2);
        list.add("Chocolate");
        list.add("10");

        // print the list
        System.out.println("LinkedList:" + list);

        // add a new element at the beggining of the list
        list.addFirst("Element");

        // print the new list
        System.out.println("LinkedList:" + list);
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
LinkedList:[Hello, 2, Chocolate, 10]
LinkedList:[Element, Hello, 2, Chocolate, 10]
```
