Declaration

Following is the declaration for **java.util.ListResourceBundle.getKeys** method

```
public Enumeration<String> getKeys()
```

Parameters

- NA

Return Value

This method returns an Enumeration of the keys contained in this ResourceBundle and its parent bundles.

Exception

- NA

Example

The following example shows the usage of java.util.ListResourceBundle.getKeys method.

```
package com.tutorialspoint;

import java.util.*;

// create a class that extends to ListResourceBundle
class MyResources extends ListResourceBundle {

    // get contents must be implemented
    protected Object[][] getContents() {
        return new Object[][]{
            {"hello", "Hello World!"},
            {"bye", "Goodbye World!"},
            {"goodnight", "Goodnight World!"}
        };
    }
}

public class ListResourceBundleDemo {

    public static void main(String[] args) {

        // create a new MyResources instance
        MyResources mr = new MyResources();

        // get the keys
        Enumeration<String> enumeration = mr.getKeys();

        // print the keys
        while (enumeration.hasMoreElements()) {
            System.out.println("" + enumeration.nextElement());
        }
    }
}
```

```
}
```

Let us compile and run the above program, this will produce the following result:

```
hello  
goodnight  
bye
```
