Following is the declaration for **java.util.Locale.getDefault** method

```
public static Locale getDefault()
```

Parameters

- NA

Return Value

This method returns the default locale for this instance of the Java Virtual Machine

Exception

- NA

Example

The following example shows the usage of java.util.Locale.getDefault method.

```
package com.tutorialspoint;  
  
import java.util.*;  
  
public class LocaleDemo {  
  
    public static void main(String[] args) {  
  
        // create a new locale  
        Locale locale = Locale.getDefault();  
  
        // print the default locale  
        System.out.println("Locale:" + locale);  
  
    }  
}
```

Let us compile and run the above program, this will produce the following result:

```
Locale: en GR
```
