Declaration

Following is the declaration for **java.util.Locale.getLanguage** method

```
public String getLanguage()
```

Parameters

- NA

Return Value

This method does not return a value.

Exception

- NA

Example

The following example shows the usage of java.util.Locale.getLanguage method.

```
package com.tutorialspoint;

import java.util.*;

public class LocaleDemo {

    public static void main(String[] args) {

        // create a new locale
        Locale locale = new Locale("en", "US", "WIN");

        // print locale
        System.out.println("Locale:" + locale);

        // get language and print it
        System.out.println("Language:" + locale.getLanguage());
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
Locale:en_US_WIN
Language:en
```
