

JAVA.UTIL.LOCALE.HASHCODE METHOD

http://www.tutorialspoint.com/java/util/locale_hashcode.htm

Copyright © tutorialspoint.com

Description

The **java.util.Locale.hashCode** method returns a hash code for this locale.

Declaration

Following is the declaration for **java.util.Locale.hashCode** method

```
public int hashCode()
```

Parameters

- NA

Return Value

This method returns a hash code value for this object.

Exception

- NA

Example

The following example shows the usage of java.util.Locale.hashCode method.

```
package com.tutorialspoint;

import java.util.*;

public class LocaleDemo {

    public static void main(String[] args) {

        // create a new locale
        Locale locale = new Locale("en", "US", "WIN");

        // print locale
        System.out.println("Locale:" + locale);

        // get a hash code and print it
        System.out.println("Language:" + locale.hashCode());
    }
}
```

Let us compile and run the above program, this will produce the following result:

```
Locale:en_US_WIN
Language:1595486
```
