

JAVA.UTIL.RANDOM.NEXTLONG METHOD

http://www.tutorialspoint.com/java/util/random_nextlong.htm

Copyright © tutorialspoint.com

Description

The **nextLong** method is used to return the next pseudorandom, uniformly distributed long value from this random number generator's sequence.

Declaration

Following is the declaration for **java.util.Random.nextLong** method.

```
public long nextLong()
```

Parameters

- NA

Return Value

The method call returns the next pseudorandom, uniformly distributed long value from this random number generator's sequence.

Exception

- NA

Example

The following example shows the usage of `java.util.Random.nextLong`

```
package com.tutorialspoint;

import java.util.*;

public class RandomDemo {
    public static void main( String args[] ){
        // create random object
        Random randomno = new Random();

        // get next long value
        long value = randomno.nextLong();

        // check the value
        System.out.println("Long value is: " + value);
    }
}
```

Let us compile and run the above program, this will produce the following result.

```
Long value is: 3285573610483682037
```
