

JAVA.UTIL.SIMPLETIMEZONE.INDAYLIGHTTIME METHOD

http://www.tutorialspoint.com/java/util/simpletimezone_indaylighttime.htm

Copyright © tutorialspoint.com

Description

The **inDaylightTime** method is used to query if the given date is in daylight saving time.

Declaration

Following is the declaration for **java.util.SimpleTimeZone.inDaylightTime** method.

```
public boolean inDaylightTime(Date date)
```

Parameters

- **date** -- This is the given Date.

Return Value

The method call returns 'true' if daylight saving time is in effective at the given date; false otherwise.

Exception

- NA

Example

The following example shows the usage of **java.util.SimpleTimeZone.inDaylightTime**

```
package com.tutorialspoint;

import java.util.*;

public class SimpleTimeZoneDemo {
    public static void main( String args[] ){
        // create simple time zone object
        SimpleTimeZone stobj1 = new SimpleTimeZone(820, "GMT");

        // create date
        Date date = new Date(2012, 04, 23);

        // check day light
        boolean daylight=stobj1.inDaylightTime(date);

        // checking the value of day light
        System.out.println("Is in day light : " + daylight);
    }
}
```

Let us compile and run the above program, this will produce the following result.

```
Is in day light : false
```
