

JAVA.UTIL.TIMEZONE.GETDEFAULT METHOD EXAMPLE

http://www.tutorialspoint.com/java/util/timezone_getdefault.htm

Copyright © tutorialspoint.com

Description

The **getDefault** method is used to get the default TimeZone for this host. The source of the default TimeZone may vary with implementation.

Declaration

Following is the declaration for **java.util.TimeZone.getDefault** method.

```
public static TimeZone getDefault()
```

Parameters

- NA

Return Value

The method call returns a default TimeZone.

Exception

- NA

Example

The following example shows the usage of java.util.TimeZone.getDefault

```
package com.tutorialspoint;

import java.util.*;

public class TimeZoneDemo {
    public static void main( String args[] ){

        // create default time zone object
        TimeZone timezonedefault = TimeZone.getDefault();

        // checking default time zone value
        System.out.println("Default time zone is :\n" + timezonedefault);
    }
}
```

Let us compile and run the above program, this will produce the following result.

```
Default time zone is :
sun.util.calendar.ZoneInfo[, offset=19800000, dstSavings=0,
useDaylight=false, transitions=6, lastRule=null]
Loading [MathJax]/jax/output/HTML-CSS/fonts/TeX/fontdata.js
```
