

JAVA.UTIL.UUID.HASHCODE METHOD

http://www.tutorialspoint.com/java/util/uuid_hashcode.htm

Copyright © tutorialspoint.com

Description

The **hashCode** method is used to return a hash code for this UUID.

Declaration

Following is the declaration for **java.util.UUID.hashCode** method.

```
public int hashCode()
```

Parameters

- NA

Return Value

The method call returns a hash code value for this UUID.

Exception

- NA

Example

The following example shows the usage of java.util.UUID.hashCode

```
package com.tutorialspoint;

import java.util.*;

public class UUIDDemo {
    public static void main(String[] args) {
        // creating UUID
        UUID uid = UUID.fromString("38400000-8cf0-11bd-b23e-10b96e4ef00d");

        // checking hash code value
        System.out.println("Hash code value: "+uid.hashCode());
    }
}
```

Let us compile and run the above program, this will produce the following result.

```
Hash code value: 1757475081
```
