

JAVA.UTIL.UUID.NODE METHOD

http://www.tutorialspoint.com/java/util/uuid_node.htm

Copyright © tutorialspoint.com

Description

The **node** method is used to get the node value associated with this UUID.

Declaration

Following is the declaration for **java.util.UUID.node** method.

```
public long node()
```

Parameters

- NA

Return Value

The method call returns the node value of this UUID.

Exception

- **UnsupportedOperationException** -- This exception is thrown if this UUID is not a version 1 UUID.

Example

The following example shows the usage of java.util.UUID.node

```
package com.tutorialspoint;

import java.util.*;

public class UUIDDemo {
    public static void main(String[] args) {
        // creating UUID
        UUID uid = UUID.fromString("38400000-8cf0-11bd-b23e-10b96e4ef00d");

        // checking node value
        System.out.println("Node value is: "+uid.node());
    }
}
```

Let us compile and run the above program, this will produce the following result.

```
Node value is: 18388605661197
```
