

JAVA.UTIL.WEAKHASHMAP.ISEMPY METHOD

http://www.tutorialspoint.com/java/util/weakhashmap_isempty.htm

Copyright © tutorialspoint.com

Description

The **isEmpty** method is used to return true if this map contains no key-value mappings

Declaration

Following is the declaration for **java.util.WeakHashMap.isEmpty** method.

```
public boolean isEmpty()
```

Parameters

- NA

Return Value

The method call returns true if this map contains no key-value mappings.

Exception

- NA

Example

The following example shows the usage of java.util.WeakHashMap.isEmpty method.

```
package com.tutorialspoint;

import java.util.Map;
import java.util.WeakHashMap;

public class WeakHashMapDemo {
    public static void main(String[] args) {
        Map<String, String> weakHashMap = new WeakHashMap<String, String>();

        // check map contents
        System.out.println("Checking the map entries");
        System.out.println("Map is empty: "+weakHashMap.isEmpty());

        // put keys and values in the Map
        System.out.println("Putting values into the Map");
        weakHashMap.put("1", "first");
        weakHashMap.put("2", "two");
        weakHashMap.put("3", "three");

        // checking Map
        System.out.println("Map is empty: "+weakHashMap.isEmpty());
    }
}
```

Let us compile and run the above program, this will produce the following result.

```
Checking the map entries
Map is empty: true
Putting values into the Map
Map is empty: false
```
