Problem Description:

How to reverse an array list ?

Solution:

Following example reverses an array list by using `Collections.reverseArrayList` method.

```
import java.util.ArrayList;
import java.util.Collections;

public class Main {
    public static void main(String[] args) {
        ArrayList arrayList = new ArrayList();
        arrayList.add("A");
        arrayList.add("B");
        arrayList.add("C");
        arrayList.add("D");
        arrayList.add("E");
        System.out.println("Before Reverse Order: " + arrayList);
        Collections.reverse(arrayList);
        System.out.println("After Reverse Order: " + arrayList);
    }
}
```

Result:

The above code sample will produce the following result.

```
Before Reverse Order: [A, B, C, D, E]
After Reverse Order: [E, D, C, B, A]
```
