Problem Description:

How to replace an element in a list

Solution:

Following example uses replaceAll method to replace all the occurrence of an element with a different element in a list.

```
import java.util.*;

public class Main {
    public static void main(String[] args) {
        List list = Arrays.asList("one Two three Four five six
one three Four".split(" "));
        System.out.println("List :"+list);
        Collections.replaceAll(list, "one", "hundread");
        System.out.println("replaceAll: " + list);
    }
}
```

Result:

The above code sample will produce the following result.

```
List :[one, Two, three, Four, five, six, one, three, Four]
replaceAll: [hundread, Two, three, Four, five, six,
hundread, three, Four]
```
