Problem Description:

How to delete many elements from a linkedList?

Solution:

Following example demonstrates how to delete many elements of linkedList using Clear method.

```
import java.util.*;

public class Main {
    public static void main(String[] args) {
        LinkedList<String> lList = new LinkedList<String>();
        lList.add("1");
        lList.add("8");
        lList.add("6");
        lList.add("4");
        lList.add("5");
        System.out.println(lList);
        lList.subList(2, 4).clear();
        System.out.println(lList);
    }
}
```

Result:

The above code sample will produce the following result.

```
[one, two, three, four, five]
[one two three Replaced five]
```
