Problem Description:

How to swap two elements in a vector ?

Solution:

Following example .

```
import java.util.Collections;
import java.util.Vector;

public class Main {
    public static void main(String[] args) {
        Vector<String> v = new Vector();
        v.add("1");
        v.add("2");
        v.add("3");
        v.add("4");
        v.add("5");
        System.out.println(v);
        Collections.swap(v, 0, 4);
        System.out.println("After swapping");
        System.out.println(v);
    }
}
```

Result:

The above code sample will produce the following result.

```
1 2 3 4 5
After swapping
5 2 3 4 1
```
