Problem Description:

How to update a linked list ?

Solution:

Following example demonstrates how to update a linked list by using `listname.add` and `listname.set` methods of `LinkedList` class.

```
import java.util.LinkedList;

public class MainClass {
    public static void main(String[] a) {
        LinkedList officers = new LinkedList();
        officers.add("B");
        officers.add("B");
        officers.add("T");
        officers.add("H");
        officers.add("P");
        System.out.println(officers);
        officers.set(2, "M");
        System.out.println(officers);
    }
}
```

Result:

The above code sample will produce the following result.

```
BBTHP
BRMHP
```
