Problem Description:

How to format time in AM-PM format?

Solution:

This example formats the time by using SimpleDateFormat "HH-mm-ssa" constructor and sdf.format(date) method of SimpleDateFormat class.

```
import java.text.SimpleDateFormat;
import java.util.Date;

public class Main{
    public static void main(String[] args){
        Date date = new Date();
        String strDateFormat = "HH:mm:ss a";
        SimpleDateFormat sdf = new SimpleDateFormat(strDateFormat);
        System.out.println(sdf.format(date));
    }
}
```

Result:

The above code sample will produce the following result. The result will change depending upon the current system time

06:40:32 AM
