Problem Description:

How to display current date and time?

Solution:

This example shows how to display the current date and time using `Calendar.getInstance` method of `Calendar` class and `fmt.format` method of `Formatter` class.

```
import java.util.Calendar;
import java.util.Formatter;

public class MainClass{
    public static void main(String args[]){
        Formatter fmt = new Formatter();
        Calendar cal = Calendar.getInstance();
        fmt = new Formatter();
        fmt.format("%tc", cal);
        System.out.println(fmt);
    }
}
```

Result:

The above code sample will produce the following result. The result will change depending upon the current system date and time
