Problem Description:

How to display name of a month in *MMM* format ?

Solution:

This example shows how to display the current month in the *MMM* format with the help of `Calendar.getInstance` method of `Calendar` class and `fmt.format` method of `Formatter` class.

```
import java.util.Calendar;
import java.util.Formatter;

public class MainClass{
    public static void main(String args[]){
        Formatter fmt = new Formatter();
        Calendar cal = Calendar.getInstance();
        fmt = new Formatter();
        fmt.format("%tB %tb %tm", cal, cal, cal);
        System.out.println(fmt);
    }
}
```

Result:

The above code sample will produce the following result.

October Oct 10
