Problem Description:

How to display name of the weekdays ?

Solution:

This example displays the names of the weekdays in short form with the help of `DateFormatSymbols.getWeekdays` method of `DateFormatSymbols` class.

```
import java.text.SimpleDateFormat;
import java.text.DateFormatSymbols;

public class Main {
    public static void main(String[] args) {
        String[] weekdays = new DateFormatSymbols().getWeekdays();
        for (int i = 2; i < (weekdays.length-1); i++) {
            String weekday = weekdays[i];
            System.out.println("weekday = " + weekday);
        }
    }
}
```

Result:

The above code sample will produce the following result.

```
weekday = Monday
weekday = Tuesday
weekday = Wednesday
weekday = Thursday
weekday = Friday
```
