Problem Description:

How to find which week of the year, month?

Solution:

The following example displays week no of the year & month.

```
import java.util.*;

public class Main {
    public static void main(String[] args) throws Exception {
        Date d1 = new Date();
        Calendar c1 = Calendar.getInstance();
        c1.setTime(d1);
        System.out.println("today is "
            + c1.WEEK_OF_YEAR+ " week of the year");
        System.out.println("today is a "+c1.DAY_OF_MONTH +
            "month of the year");
        System.out.println("today is a "+c1.WEEK_OF_MONTH
            +"week of the month");
    }
}
```

Result:

The above code sample will produce the following result.

```
today is 30 week of the year
today is a 5month of the year
today is a 4week of the month
```
