Problem Description:

How to find current working directory?

Solution:

Following example shows how to get current directory using getProperty method.

```
class Main {  
    public static void main(String[] args) {  
        String curDir = System.getProperty("user.dir");  
        System.out.println("You currently working in :"  
            + curDir+ ": Directory");  
    }  
}
```

Result:

The above code sample will produce the following result.

```
You currently working in :C:\Documents and Settings\user\  
My_Documents\NetBeansProjects\TestApp: Directory  
Loading [MathJax]/jax/output/HTML-CSS/jax.js
```
