Problem Description:

How to get the parent directory of a file?

Solution:

Following example shows how to get the parent directory of a file by the use of file.getParent method of File class.

```
import java.io.File;

public class Main {
    public static void main(String[] args) {
        File file = new File("C:/File/demo.txt");
        String strParentDirectory = file.getParent();
        System.out.println("Parent directory is : "
            + strParentDirectory);
    }
}
```

Result:

The above code sample will produce the following result.

```
Parent directory is : File
Loading [MathJax]/jax/output/HTML-CSS/jax.js
