Problem Description:

How to get the size of a directory?

Solution:

Following example shows how to get the size of a directory with the help of `FileUtils.sizeOfDirectory` `FileName` method of `FileUtils` class.

```
import java.io.File;
import org.apache.commons.io.FileUtils;

public class Main {
    public static void main(String[] args) {
        long size = FileUtils.sizeOfDirectory
            (new File("C:/Windows"));
        System.out.println("Size: " + size + " bytes");
    }
}
```

Result:

The above code sample will produce the following result.

```
Size: 2048 bytes
```
