Problem Description:

How to check version of java running on your system?

Solution:

Following example demonstrates how to check version of java installed on your system using version argument with java command.

```
java -version
```

Result:

The above code sample will produce the following result.

```
java version "1.6.0_13"  
Java(TM) SE Runtime Environment (build 1.6.0_13-b03)  
Java HotSpot(TM) Client VM (build 11.3-b02, mixed mode, sharing)
```
