Problem Description:

How to handle runtime exceptions?

Solution:

This example shows how to handle the runtime exception in a java programs.

```
public class NeverCaught {  
    static void f() {  
        throw new RuntimeException("From f()");  
    }  
    static void g() {  
        f();  
    }  
    public static void main(String[] args) {  
        g();  
    }  
}
```

Result:

The above code sample will produce the following result.

```
From f()
```
