

JAVA EXAMPLES - CREATION OF FILE

http://www.tutorialspoint.com/javaexamples/file_dir.htm

Copyright © tutorialspoint.com

Problem Description:

How to create a file in a specified directory ?

Solution:

This example demonstrates how to create a file in a specified directory using File.createTempFile method of File class.

```
import java.io.File;

public class Main {
    public static void main(String[] args)
        throws Exception {
        File file = null;
        File dir = new File("C:/");
        file = File.createTempFile
            ("JavaTemp", ".javatemp", dir);
        System.out.println(file.getPath());
    }
}
```

Result:

The above code sample will produce the following result.

```
C:\JavaTemp37056_javatemp
Loading [MathJax]/jax/output/HTML-CSS/fonts/TeX/fontdata.js
```
