Problem Description:

How to check a file exist or not?

Solution:

This example shows how to check a file's existence by using file.exists method of File class.

```
import java.io.File;

public class Main {
    public static void main(String[] args) {
        File file = new File("C:/java.txt");
        System.out.println(file.exists());
    }
}
```

Result:

The above code sample will produce the following result if the file " java. txt " exists in 'C' drive.

```
true
```
