Problem Description:

How to make a file read-only?

Solution:

This example demonstrates how to make a file read-only by using `file.setReadOnly()` and `file.canWrite()` methods of `File` class .

```
import java.io.File;

public class Main {
    public static void main(String[] args) {
        File file = new File("C:/java.txt");
        System.out.println(file.setReadOnly());
        System.out.println(file.canWrite());
    }
}
```

Result:

The above code sample will produce the following result. To test the example, first create a file 'java.txt' in 'C' drive.

```
true
false
```
