Problem Description:

How to rename a file?

Solution:

This example demonstrates how to renaming a file using `oldName.renameTo(newName)` method of `File` class.

```
import java.io.File;

public class Main {
    public static void main(String[] args) {
        File oldName = new File("C:/program.txt");
        File newName = new File("C:/java.txt");
        if(oldName.renameTo(newName)) {
            System.out.println("renamed");
        } else {
            System.out.println("Error");
        }
    }
}
```

Result:

The above code sample will produce the following result. To test this example, first create a file 'program.txt' in 'C' drive.

renamed
