JAVA EXAMPLES - WRITE TO A FILE

Problem Description:

How to write into a file ?

Solution:

This example shows how to write to a file using write method of BufferedWriter.

```java
import java.io.*;

public class Main {
   public static void main(String[] args)  {
      try {
         BufferedWriter out = new
         BufferedWriter(new FileWriter("outfilename"));
         out.write("aString");
         out.close();
         System.out.println
         ("File created successfully");
      }
      catch (IOException e) {
      }
   }
}
```

Result:

The above code sample will produce the following result.

```
File created successfully.
```
