Problem Description:

How to create a transparent cursor?

Solution:

Following example demonstrates how to create a transparent cursor by using `createCustomCursor` method with "invisiblecursor" as an argument.

```
import java.awt.*;
import java.awt.image.MemoryImageSource;

public class Main {
    public static void main(String[] argv) throws Exception {
        int[] pixels = new int[16 * 16];
        Image image = Toolkit.getDefaultToolkit().createImage(
            new MemoryImageSource(16, 16, pixels, 0, 16));
        Cursor transparentCursor = Toolkit.getDefaultToolkit().
            createCustomCursor(image, new Point(0, 0),
                "invisibleCursor");
        System.out.println("Transparent Cursor created.");
    }
}
```

Result:

The above code sample will produce the following result.

Transparent Cursor created
