Problem Description:

How to replace a substring inside a string by another one ?

Solution:

This example describes how replace method of java String class can be used to replace character or substring by new one.

```
public class StringReplaceEmp{
    public static void main(String args[]){
        String str="Hello World";
        System.out.println( str.replace( 'H','W' ) );
        System.out.println( str.replaceFirst("He", "Wa") );
        System.out.println( str.replaceAll("He", "Ha") );
    }
}
```

Result:

The above code sample will produce the following result.

```
Wello World
Wallo World
Hallo World
```
