

# JAVASCRIPT - ARRAY SHIFT METHOD

[http://www.tutorialspoint.com/javascript/array\\_shift.htm](http://www.tutorialspoint.com/javascript/array_shift.htm)

Copyright © tutorialspoint.com

## Description

Javascript array **shift** method removes the first element from an array and returns that element.

## Syntax

Its syntax is as follows –

```
array.shift();
```

## Return Value

Returns the removed single value of the array.

## Example

Try the following example.

```
<html>
  <head>
    <title>JavaScript Array shift Method</title>
  </head>

  <body>

    <script type="text/javascript">
      var element = [105, 1, 2, 3].shift();
      document.write("Removed element is : " + element );
    </script>

  </body>
</html>
```

## Output

```
Removed element is : 105
```
