

JAVASCRIPT - BOOLEAN CONSTRUCTOR METHOD

http://www.tutorialspoint.com/javascript/boolean_constructor.htm

Copyright © tutorialspoint.com

Description

Javascript boolean **constructor** method returns a reference to the Boolean function that created the instance's prototype.

Syntax

Use the following syntax to create a Boolean constructor method.

```
boolean.constructor()
```

Return Value

Returns the function that created this object's instance.

Example

Try the following example.

```
<html>
  <head>
    <title>JavaScript constructor() Method</title>
  </head>

  <body>

    <script type="text/javascript">
      var bool = new Boolean( );
      document.write("bool.constructor() is:"+bool.constructor);
    </script>

  </body>
</html>
```

Output

```
bool.constructor() is : function Boolean() { [native code] }
