Copyright © tutorialspoint.com

Description

JavaScript date **constructor** property returns a reference to the array function that created the instance's prototype.

Syntax

Its syntax is as follows –

```
date.constructor
```

Return Value

Returns the function that created this object's instance.

Example

Try the following example.

```
<html>
  <head>
    <title>JavaScript Date constructor Property</title>
  </head>

  <body>

    <script type="text/javascript">
      var dt = new Date();
      document.write("dt.constructor is : " + dt.constructor);
    </script>

  </body>
</html>
```

Output

```
dt.constructor is: function Date() { [native code] }
```
