

JAVASCRIPT - DATE GETFULLYEAR METHOD

http://www.tutorialspoint.com/javascript/date_getfullyear.htm

Copyright © tutorialspoint.com

Description

JavaScript date **getFullYear** method returns the year of the specified date according to local time. The value returned by **getFullYear** is an absolute number. For dates between the years 1000 and 9999, **getFullYear** returns a four-digit number, for example, 2008.

Syntax

Its syntax is as follows –

```
Date.getFullYear()
```

Return Value

Returns the year of the specified date according to local time.

Example

Try the following example.

```
<html>
  <head>
    <title>JavaScript getFullYear Method</title>
  </head>

  <body>

    <script type="text/javascript">
      var dt = new Date("December 25, 1995 23:15:00");
      document.write("getFullYear() : " + dt.getFullYear() );
    </script>

  </body>
</html>
```

Output

```
getFullYear() : 1995
```
