Copyright © tutorialspoint.com

Description

JavaScript date **getMonth** method returns the month in the specified date according to local time. The value returned by **getMonth** is an integer between 0 and 11. 0 corresponds to January, 1 to February, and so on.

Syntax

Its syntax is as follows –

```
Date.getMonth()
```

Return Value

Returns the Month in the specified date according to local time.

Example

Try the following example.

```
<html>
  <head>
    <title>JavaScript getMonth Method</title>
  </head>

  <body>

    <script type="text/javascript">
      var dt = new Date( "December 25, 1995 23:15:00" );
      document.write("getMonth() : " + dt.getMonth() );
    </script>

  </body>
</html>
```

Output

```
getMonth() : 11
```
