Copyright © tutorialspoint.com

Description

JavaScript date **getUTCHours** method returns the hours in the specified date according to universal time. The value returned by **getUTCHours** is an integer between 0 and 23.

Syntax

Its syntax is as follows –

```
Date.getUTCHours ()
```

Return Value

Returns the hours in the specified date according to universal time.

Example

Try the following example.

```
<html>
  <head>
    <title>JavaScript getUTCHours Method</title>
  </head>

  <body>

    <script type="text/javascript">
      var dt = new Date();
      document.write("getUTCHours() : " + dt.getUTCHours() );
    </script>

  </body>
</html>
```

Output

```
getUTCHours() : 11
```
