Description

JavaScript date **getUTCMilliseconds** method returns the milliseconds in the specified date according to universal time. The value returned by **getUTCMilliseconds** is an integer between 0 and 999.

Syntax

Its syntax is as follows –

```
Date.getUTCMilliseconds()
```

Return Value

Returns the milliseconds in the specified date according to universal time.

Example

Try the following example.

```
<html>
  <head>
    <title>JavaScript getUTCMilliseconds Method</title>
  </head>

  <body>

    <script type="text/javascript">
      var dt = new Date();
      document.write("getUTCMilliseconds() : " + dt.getUTCMilliseconds() );
    </script>

  </body>
</html>
```

Output

```
getUTCMilliseconds() : 206
```
