Copyright © tutorialspoint.com

Description

This method returns the primitive value of a Date object as a number data type, the number of milliseconds since midnight 01 January, 1970 UTC.

Syntax

Its syntax is as follows –

```
Date.valueOf ()
```

Return Value

Returns the primitive value of a Date object.

Example

Try the following example.

```
<html>

  <head>
    <title>JavaScript valueOf Method</title>
  </head>

  <body>

    <script type="text/javascript">
      var dateobject = new Date(1993, 6, 28, 14, 39, 7);
      document.write( dateobject.valueOf() );
    </script>

  </body>
</html>
```

Output

```
743850547000
```
