

JAVASCRIPT STRING - FONTSIZE METHOD

http://www.tutorialspoint.com/javascript/string_fontsize.htm

Copyright © tutorialspoint.com

Description

This method causes a string to be displayed in the specified size as if it were in a **** tag.

Syntax

Its syntax is as follows –

```
string.fontSize( size )
```

Attribute Details

size – An integer between 1 and 7, a string representing a signed integer between 1 and 7.

Return Value

Returns the string with **** tag.

Example

Try the following example.

```
<html>
  <head>
    <title>JavaScript String fontsize() Method</title>
  </head>

  <body>

    <script type="text/javascript">
      var str = new String("Hello world");
      alert(str.fontSize( 3 ));
    </script>

  </body>
</html>
```

Output

```
<font size="3">Hello world</font>
