

JAVASCRIPT STRING - LINK METHOD

http://www.tutorialspoint.com/javascript/string_link.htm

Copyright © tutorialspoint.com

Description

This method creates an HTML hypertext link that requests another URL.

Syntax

The syntax for link method is as follows –

```
string.link( hrefname )
```

Attribute Details

hrefname – Any string that specifies the HREF of the A tag; it should be a valid URL.

Return Value

Returns the string with <a> tag.

Example

Try the following example.

```
<html>
  <head>
    <title>JavaScript String link() Method</title>
  </head>

  <body>

    <script type="text/javascript">
      var str = new String("Hello world");
      var URL = "http://www.tutorialspoint.com";

      alert(str.link( URL ));
    </script>

  </body>
</html>
```

Output

```
<a href="http://www.tutorialspoint.com">Hello world</a>
```
