Google Checkout is online payment processing service provided by Google. Magento allows integration of online stores with Google checkout. It is like PayPal that simplifies the process of paying for online purchases. To use Google Checkout, customers need to have Google Checkout merchant account.

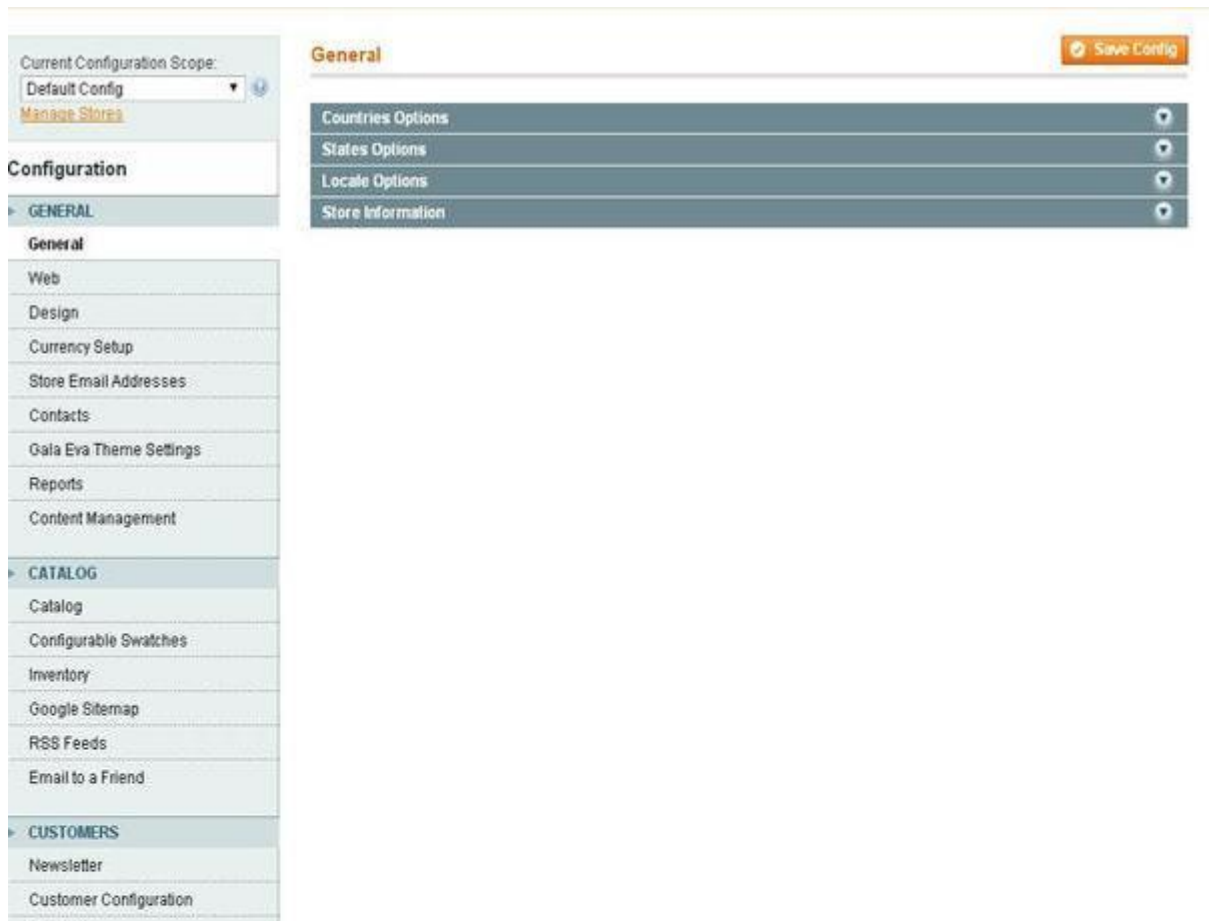

The following steps help to set up Magento store with Google Checkout.

Step 1: Login to your Magento Admin Panel.

Step 2: Go to **System** menu and click on the **Configuration** option.

Step 3: On the left side of the navigation, click on the **Google API** under **Sales** section.

Step 4: Expand the **Google Analytics** panel which shows some settings such as:

- *Enable* option should be set to Yes to activate payment method,
- *Type* option provides two types: Google Analytics and Universal Analytics,
- *Account Number* accepts your account number,
- *Enable IP anonymization* option should be set to Yes.

A screenshot of the 'Google API' configuration panel in Magento. The panel title is 'Google API'. In the top right corner, there is an orange 'Save Config' button with a circular arrow icon, which is highlighted with a red circle. Below the title bar, there is a 'Google Analytics' section with a close button. This section contains four settings: 'Enable' set to 'Yes', 'Type' set to 'Google Analytics', 'Account Number' (empty text field), and 'Enable IP anonymization' set to 'Yes'. Each setting has a '[STORE VIEW]' link to its right. A small triangle icon and the text 'The tracking code to use.' are visible below the 'Type' dropdown.

After done with the settings, click on the **Save Config** button in top right corner to save the changes that you have made.
