Payment gateway processes the credit card data securely between customer and merchant and also between merchant and the payment processor. It is like checkpoint that protects customers against attempting to gather personal and financial information from customers and also act as mediator between the merchant and sponsoring bank.

The following steps describe how to setup payment gateway in Magento:

**Step 1:** Login to your Magento Admin Panel.

**Step 2:** Go to **System** menu and click on the **Configuration** option.

**Step 3:** Next you will see some list of options on the left side of the page. Scroll down and go to the **Sales** section and click on the **Payment Methods** option.

**Step 4:** Under the **Payment Methods** section, expand the **PayPal Payment Gateways** option. It provides two types of payment gateway methods; one is **Payflow Pro Includes ExpressCheckout** and **Payflow Link Includes ExpressCheckout**. Click on the **Configure** button to enter details for Payflow Pro and Payflow Link options respectively.

from PayPal

**PayPal Payflow Link (Includes Express Checkout)** [Learn More](#)  
Connect your merchant account with a PCI-compliant gateway that lets customers pay without leaving your site.

**Payflow** [Configure](#)  
from PayPal

The **Payflow Pro** option is a customizable payment gateway which can be used with a merchant account to process credit card transactions. It doesn't need a PayPal account as they can enter their credit card information directly on site and you need to add API credentials in the Magento admin panel. It is also used to process PayPal Express Checkout transactions.

*It allows customers to pay by credit card or from the security of their personal PayPal accounts.*

Under the **Payflow Link** option, once the customer decides to checkout, the checkout process is carried out on the PayPal site. It is often called a hosted payment gateway that keeps the customer on your site by providing a fast and easy way to add transaction processing to your site.
