MATLAB - ADDITION & SUBTRACTION OF VECTORS

You can add or subtract two vectors. Both the operand vectors must be of same type and have same number of elements.

Example

Create a script file with the following code −

```
A = [7, 11, 15, 23, 9];
B = [2, 5, 13, 16, 20];
C = A + B;
D = A - B;
disp(C);
disp(D);
```

When you run the file, it displays the following result −

```
9      16     28     39     29
5       6      2      7    -11
```
