Copyright © tutorialspoint.com

Description

This function calls the system function `msgctl` with the arguments `ID`, `CMD`, and `ARG`. You may need to include the `IPC::SysV` package to obtain the correct constants.

Syntax

Following is the simple syntax for this function –

```
msgctl ID, CMD, ARG
```

Return Value

This function returns 0 but true if the system function returns 0 and 1 on success.

Example

Following is the example code showing its basic usage –

When above code is executed, it produces the following result –

```
Loading [MathJax]/jax/output/HTML-CSS/fonts/TeX/fontdata.js
```
