This step is required for first-time use only. Click Yes to begin installation of the Adobe Reader plug-in." Then after successful installing Fileopen plugin, close the window and go back and download but you need to be a PMI member to access.

## Mac Users:

MACs use Safari, which opens PDFs in the browser. That cannot work if security and other advanced functions are imbedded in the PDF. That requires a full version of PDF Reader or Adobe Acrobat installed.

Here is the APPLE support comment on reading PDFs with Safari. Adobe PDFViewer for Mac OS X will not run correctly on a system that doesn't meet the following requirements:

- Safari browser
- Mac OS X v10.3 and later

Adobe recommends Mac OS X version 10.3.4 and later and Safari version 1.2.3

*which comes with Mac OS X v10.3.5 and later*
