This section presents you various set of Mock Tests related to **SAP IDT**. You can download these sample mock tests at your local machine and solve offline at your convenience. Every mock test is supplied with a mock test key to let you verify the final score and grade yourself.

## SAP IDT MOCK TEST II

**Q 1 - While defining a connection in IDT, which of the following is not an option under connection parameters?**

- A - Pool time Out
- B - Array fetch size
- C - Array Bind size
- D - Login Timeout
- E - Authentication Mode

**Q 2 - Which of the following pane in Data Foundation editor allows you to create Aliases and Contexts, LOV's and parameters?**

- A - View Pane
- B - Properties Pane
- C - Browsing Pane
- D - All of the above

**Q 3 - In IDT Data Foundation, each row in table 1 matches one or more rows in table 2 and this properties is defined under Join Editor as?**

- A - Join
- B - Cardinality
- C - Expression
- D - Aliases

**Q 4 - In IDT Data Foundation, to create a table with columns from other tables that includes complex calculations and function which of the following feature can be used?**

- A - Alias Table
- B - Derived Table
- C - Context
- D - All of the above

**Q 5 - Which of the following can be used to break the loops in Data Foundation when you are not able break loop using an Alias table?**

- A - Alias Table
- B - Derived Table
- C - Context
- D - Joins

**Q 6 - In Business Layer under IDT, which of the following state defines an object-not valid and hidden?**

- A - Active
- B - Hidden
- C - Deprecated
- D - Invalid

**Q 7 - Which of the following can be used to improve the query performance and query generator retrieves the data from table with highest aggregation level?**

- A - Context
- B - Aggregate Awareness
- C - Alias
- D - Derived table

**Q 8 - Which of the following allows you to add the objects in the query and to preview the results to be used in BO tool?**

- A - Data Foundation
- B - Business Layer
- C - Query Panel
- D - Filters

**Q 9 - In IDT Security editor, which of the following security profile-security policy is applied on Data Foundation objects and connections?**

- A - Business Security Profile
- B - Data Security Profile
- C - Object Security Profile
- D - None of these

**Q 10 - To define Query limit options in Business layer, which of the following option you should use?**

- A - Connection Parameters
- B - Query Options
- C - Security Profile
- D - Properties
- E - Custom Properties

**Q 11 - Which of the following feature can be used to facilitate custom drill down between objects from same or different classes according to user requirement?**

- A - Custom Hierarchies
- B - Linked Universe
- C - List of Values
- D - Aggregate Awareness

**Q 12 - In which of the following Data warehousing scenario's, a fan trap normally doesn't occur?**

- A - DW based on Kimball model with direct join on fact tables
- B - DW based on Inmom model with data marts design
- C - Both of these
- D - None of these

## ANSWER SHEET

Question Number	Answer Key
1	E
2	C
3	B
4	B
5	C
6	C

7	B
8	C
9	B
10	B
11	A
12	B
